

## **Injectable Availability** <sup>[1]</sup>

Sandoz Canada, which established a milestone in transparency by providing the first national report on the availability of injectable medicines, has again innovated with the Sandoz Pro app ([sandozpro.sandoz.ca](https://sandozpro.sandoz.ca) <sup>[2]</sup>) This is a multi-platform application that enables healthcare professionals to find information on the availability of injectable medicines with just one click on their smartphone, tablet or PC. This tool is designed for healthcare professionals and buyers who want to make the most of their time since it helps them plan their injectable drug supplies and make informed decisions.

The Sandoz Pro app is simple to use: just enter the product name or code and the search engine will provide the medicine's availability status. The complete range of Sandoz Canada injectable medicines is included.

The app can be downloaded from the Apple Store and Google Play and is also available at [sandoz.ca](https://www.sandoz.ca). The tool is upgradeable and we will be adding new information and features over time.

With this new mobile app, we're meeting the needs of clients who want a supply of injectable medicines, thereby facilitating sustainable access to affordable healthcare for the patient. This first in the Canadian pharmaceutical industry shows just how committed Sandoz Canada is to maintaining its position as a leader in transparency and information sharing.

You will find <sup>[3]</sup>[here](#) <sup>[4]</sup> the National Supply Status for injectables report.

You will find [here](#) <sup>[5]</sup> the Exceeding Allocation Order/Request of Allocation Change Form (EAO/RAC Forms).
