

Injectable Availability ^[1]

Sandoz Canada established a milestone in transparency by providing the first national report on the availability of injectable medicines. Customers and healthcare professionals can check the availability of Sandoz injectable medicines by accessing our up-to-date **National Supply Status for injectables report**.

You will find ^[2][here](#) ^[3] ^[2]the National Supply Status for injectables report.

Injectable Allocation Requests

Sometimes the current market or product supply context requires that we implement product allocations based on historical demand of Sandoz products. Rest assured that we always closely monitor our supply and would remove these proactive allocations as soon as the situation stabilizes.

However, should you need to make an order exceeding your allocation or change your allocation, we ask that you fill out an **Exceeding Allocation Order** or a **Request of Allocation Change Form** online (EAO/RAC Forms).

You will find [here](#) ^[4] the Exceeding Allocation Order/Request of Allocation Change Form now available online (EAO/RAC Forms).
