PART III: CONSUMER INFORMATION

Pr.Sandoz Celecoxib
Celecoxib Capsules
100 mg and 200 mg

Read this information each time you refill your prescription in case new information has been added.

This leaflet is part III of a three-part "Product Monograph" published when Sandoz Celecoxib was approved for sale in Canada and is designed specifically for consumers. This leaflet is a summary and will not tell you everything about Sandoz Celecoxib. Contact your doctor or pharmacist if you have any questions about the drug.

ABOUT THIS MEDICATION

What the medication is used for:
Your healthcare provider has prescribed Sandoz Celecoxib for you for one or more of the following medical conditions:

- Osteoarthritis - relieve pain
- Rheumatoid Arthritis - relieve joint pain and swelling
- Ankylosing Spondylitis - relieve pain
- Sprains, after orthopaedic (bone and joint) surgery (NOT open heart surgery), dental extraction – to relieve short-term pain (maximum use of 7 days)

What it does:
Sandoz Celecoxib (celecoxib), as a nonsteroidal anti-inflammatory drug (NSAID), can reduce the type of prostaglandins (chemicals), produced by your body which cause joint swelling, redness and pain. At prescribed doses, Sandoz Celecoxib does not affect the type of prostaglandins that helps maintain the protective layer of the stomach, and reduces the chances of bleeding from the stomach.

Sandoz Celecoxib, as a nonsteroidal anti-inflammatory drug (NSAID), does NOT cure your illness or prevent it from getting worse. Sandoz Celecoxib can only relieve pain and reduce swelling as long as you continue to take it.

What dosage forms it comes in:
Capsules, 100 mg and 200 mg.

WARNINGS AND PRECAUTIONS

Serious Warnings and Precautions
If you have, or previously had, any of the following medical conditions, see your healthcare provider to discuss treatment options other than Sandoz Celecoxib:

- Heart attack or angina
- Stroke or mini-stroke
- Loss of vision
- Current pregnancy (less than 28 weeks)
- Congestive heart failure

BEFORE taking this medication tell your health care provider if you have any of the following:

- High blood pressure
- High cholesterol
- Diabetes mellitus or on a low sugar diet
- Atherosclerosis
- Poor circulation to your extremities
- Smoker or ex-smoker
- Kidney disease or urine problems
- Previous ulcer or bleeding from the stomach or gut
- Previous bleeding in the brain
- Bleeding problems
- Family history of allergy to sulfonamide drugs
- Family history of allergy to NSAIDs, such as acetylsalicylic acid (ASA), celecoxib, diclofenac, diflunisal, etodolac, fenoprofen, flurbiprofen, ibuprofen, indomethacin, ketoprofen, ketorolac, mefenamic acid, ulcerative colitis
- Liver disease (active or severe)
- Kidney disease (severe or worsening)
- High potassium in the blood

Safety and effectiveness of Sandoz Celecoxib have NOT been established in children under 18 years of age.

Patients who took a drug in the same class as Sandoz Celecoxib after a type of heart surgery (coronary artery bypass grafting (CABG) were more likely to have heart attacks, strokes, blood clots in the leg(s) or lung(s), and infections or other complications than those who did NOT take that drug.

What the medicinal ingredient is:
Celecoxib

What the nonmedicinal ingredients are:
Carrageenan, colloidal silicon dioxide, lactose monohydrate, magnesium stearate, microcrystalline cellulose, sodium lauryl sulphate and talc. The capsules are made of gelatin and contain titanium dioxide. The 100 mg capsule contains FD&C Blue # 2 Aluminum Lake E132 and the 200 mg capsule contains Yellow Iron Oxide E172.
meloxicam, nabumetone, naproxen, oxaprozin, piroxicam, rofecoxib, sulindac, tenoxicam, tiaprofenic acid, tolmefin, or valdecoxib (NOT a complete list)

- Family history of asthma, nasal polyp, long-term swelling of the sinus (chronic sinusitis) or hives
- Gastrointestinal problems (problems with your stomach and/or intestine)
- Any other medical problem

Fertility may be decreased. The use of Sandoz Celecoxib is not recommended in women who have difficulty conceiving.

Also, before taking this medication, tell your healthcare provider if you are planning to get pregnant.

**While taking this medication:**
- tell any other doctor, dentist, pharmacist or other healthcare professional that you see, that you are taking this medication, especially if you are planning to have heart surgery;
- do NOT drink alcoholic beverages while taking this medication because you would be more likely to develop stomach problems.

### INTERACTIONS WITH THIS MEDICATION

Talk to your healthcare provider and pharmacist if you are taking any other medication (prescription or non-prescription) such as any of the following (NOT a complete list):

- Acetylsalicylic Acid (ASA) or other NSAIDs (e.g. diclofenac, ibuprofen, indomethacin, ketorolac, meloxicam, naproxen)
- Antacids or proton pump inhibitors (omeprazole)
- Antidepressants [Selective serotonin receptor uptake inhibitor (SSRIs) (e.g. citalopram, paroxetine, fluoxetine, sertraline)]
- Blood pressure medications, such as ACE (angiotensin converting enzyme) inhibitors (e.g. enalapril, lisinopril, perindopril, ramipril), ARBs (angiotensin II receptor blockers) (e.g. candesartan, irbesartan, losartan, valsartan), beta-blockers (e.g. metoprolol)
- Blood thinners (to prevent blood clots), such as warfarin, apixaban, rivaroxaban, dabigatran, ASA, clopidogrel
- Corticosteroids (including glucocorticoids) e.g. prednisone
- Cyclosporin
- Digoxin
- Diuretics such as furosemide, hydrochlorothiazide
- Fluconazole
- Lithium
- Dextromethorphan (found in some cough medications)
- Tacrolimus

Using Sandoz Celecoxib with a blood thinner increases the risk of bleeding.

Your healthcare provider may prescribe low-dose ASA (acetylsalicylic acid) as a blood thinner for the prevention of having a heart attack or stroke while you are taking Sandoz Celecoxib. Take only the amount of ASA prescribed by your healthcare provider. You are more likely to upset or damage your stomach if you take both Sandoz Celecoxib and ASA than if you take Sandoz Celecoxib alone.

### PROPER USE OF THIS MEDICATION

Take Sandoz Celecoxib only as directed by your healthcare provider. **Do NOT take more of it, do NOT take it more often and do NOT take it for a longer period of time than your healthcare provider recommended.** If possible, you should take the lowest dose of this medication for the **shortest time period.**

Taking too much Sandoz Celecoxib may increase your chances of unwanted and sometimes dangerous side effects, especially if you are elderly, have other diseases or take other medications.

If you will be using Sandoz Celecoxib for more than 7 days, see your healthcare provider regularly to discuss whether this medicine is working for you and if it is causing you any unwanted effects.

This medication has been prescribed specifically for you. **Do NOT give it to anyone else. It may harm them, even if their symptoms seem to be similar to yours.**

Sandoz Celecoxib is NOT recommended for patients under 18 years of age since safety and effectiveness have NOT been established.

Sandoz Celecoxib can be taken with or without food.

**Overdose:**

If you think you have taken too much Sandoz Celecoxib, contact your healthcare professional, hospital emergency department or regional Poison Control Centre immediately, even if there are no
IMPORTANT: PLEASE READ

Missed dose:
Take the dose you missed as soon as you remember, then take the next dose at the scheduled time.

SIDE EFFECTS AND WHAT TO DO ABOUT THEM

Sandoz Celecoxib may cause some side effects, especially if used for a long time or in large doses. When these side effects occur, you may require medical attention. Report all symptoms or side effects to your healthcare provider.

Sandoz Celecoxib may cause you to become drowsy or tired. Be careful about driving or participating in activities that require you to be alert. If you become drowsy, dizzy or light-headed after taking Sandoz Celecoxib, do NOT drive or operate machinery.

Sandoz Celecoxib may cause you to become more sensitive to sunlight. Any exposure to sunlight or sunlamps may cause sunburn, skin blisters, skin rash, redness, itching or discoloration, or vision changes. If you have a reaction from the sun, check with your healthcare provider.

Check with your healthcare provider IMMEDIATELY if you develop chills, fever, muscle aches or pains, or if other flu-like symptoms occur, especially if they occur before or together with a skin rash. These symptoms may be the first signs of a SERIOUS ALLERGIC REACTION to this medication.

This is NOT a complete list of side effects. For any unexpected effects while taking Sandoz Celecoxib, contact your doctor or pharmacist.

HOW TO STORE IT

Store between 15 and 30°C.

Do NOT keep outdated medicine or medicine no longer needed. Any outdated or unused medicine should be returned to your pharmacist.

Keep out of the sight and reach of children and pets.

Reporting Side Effects
You can help improve the safe use of health products for Canadians by reporting serious and unexpected side effects to Health Canada. Your report may help to identify new side effects and change the product safety information.

3 ways to report:
Online at MedEffect;
- By calling 1-866-234-2345 (toll-free);
- By completing a Consumer Side Effect Reporting Form and sending it by:
  - Fax to 1-866-678-6789 (toll-free), or
  - Mail to: Canada Vigilance Program, Health Canada, Postal Locator 0701E, Ottawa, ON K1A 0K9

Postage paid labels and the Consumer Side Effect Reporting Form are available at MedEffect.

NOTE: Contact your health professional if you need information about how to manage your side effects. The Canada Vigilance Program does not provide medical advice.
